

# earthCell AA and AAA battery technical specifications

e: [tech@earthCellbatteries.com](mailto:tech@earthCellbatteries.com)

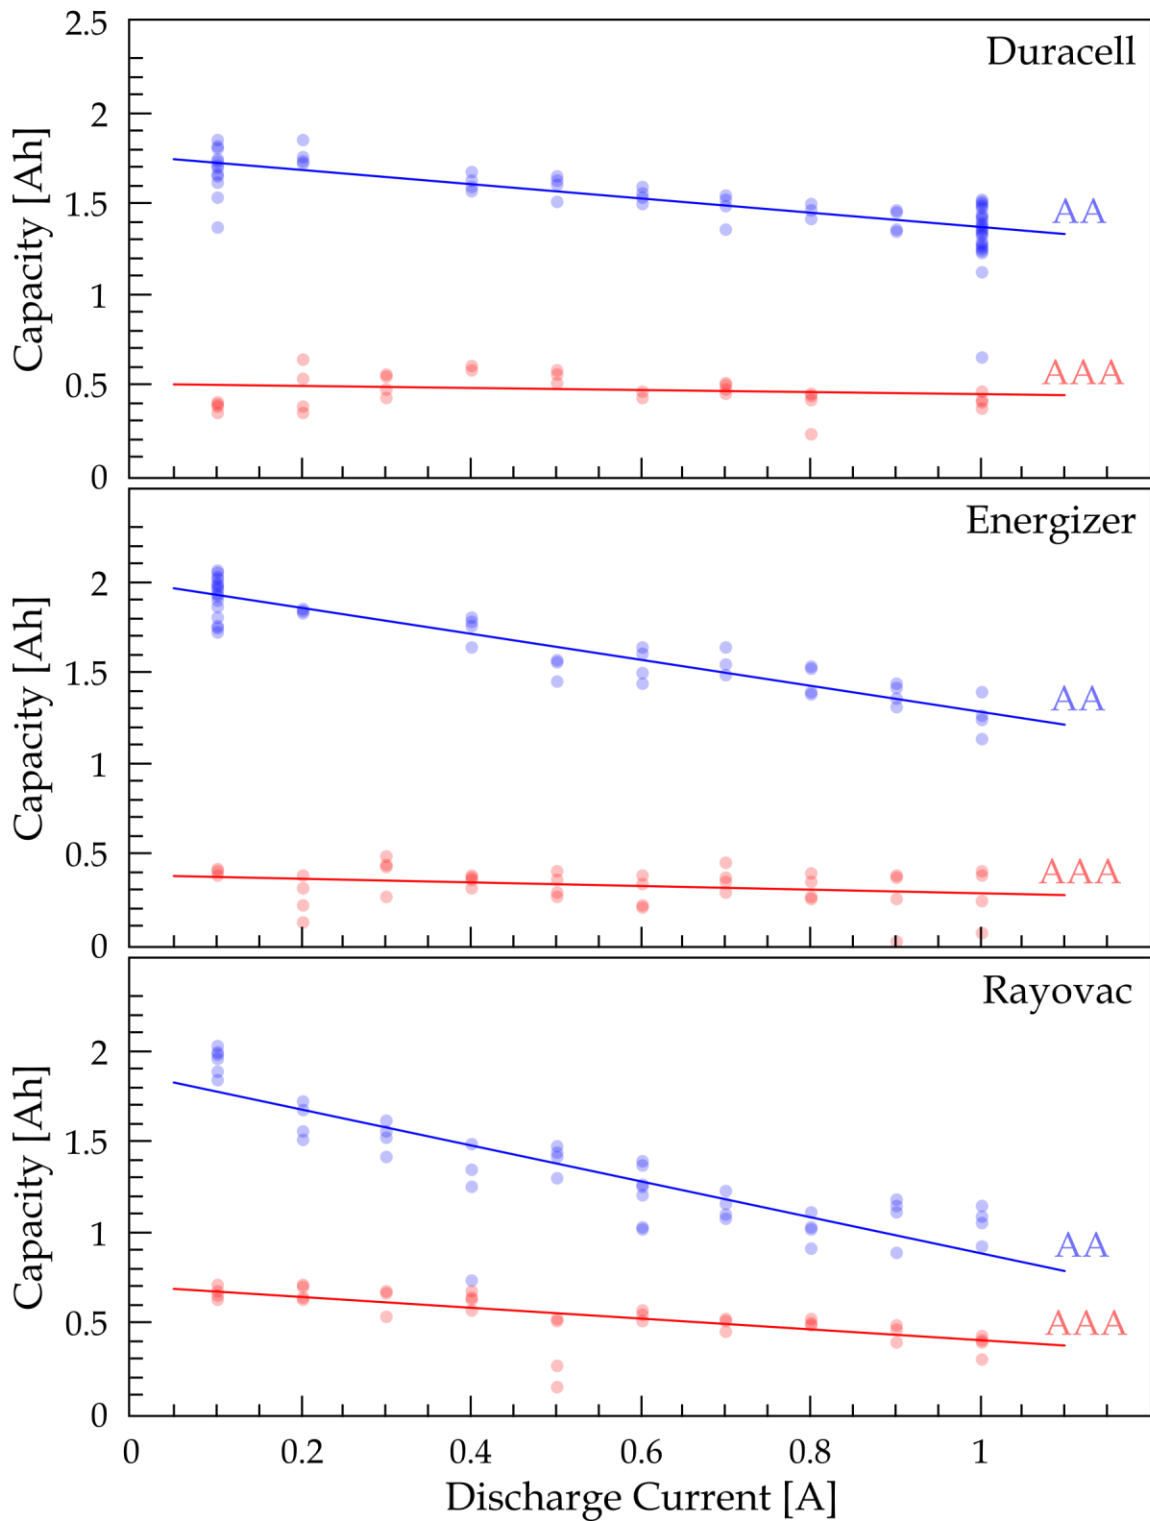

Type	Low Self-Discharge Nickel Metal Hydride Rechargeable
Capacity	See Chart.
Voltage	1.2 V (nominal)
Size [mm]	AA: 14.35 dia x 50.4 length AAA: 10.35 dia x 44.2 length (conform to IEC standard 60086)
Weight	AA: 29 g AAA: 13 g

\*can be charged with any low self-discharge NiMH charger. We recommend the PowerEx MH-C9000 for optimal results.

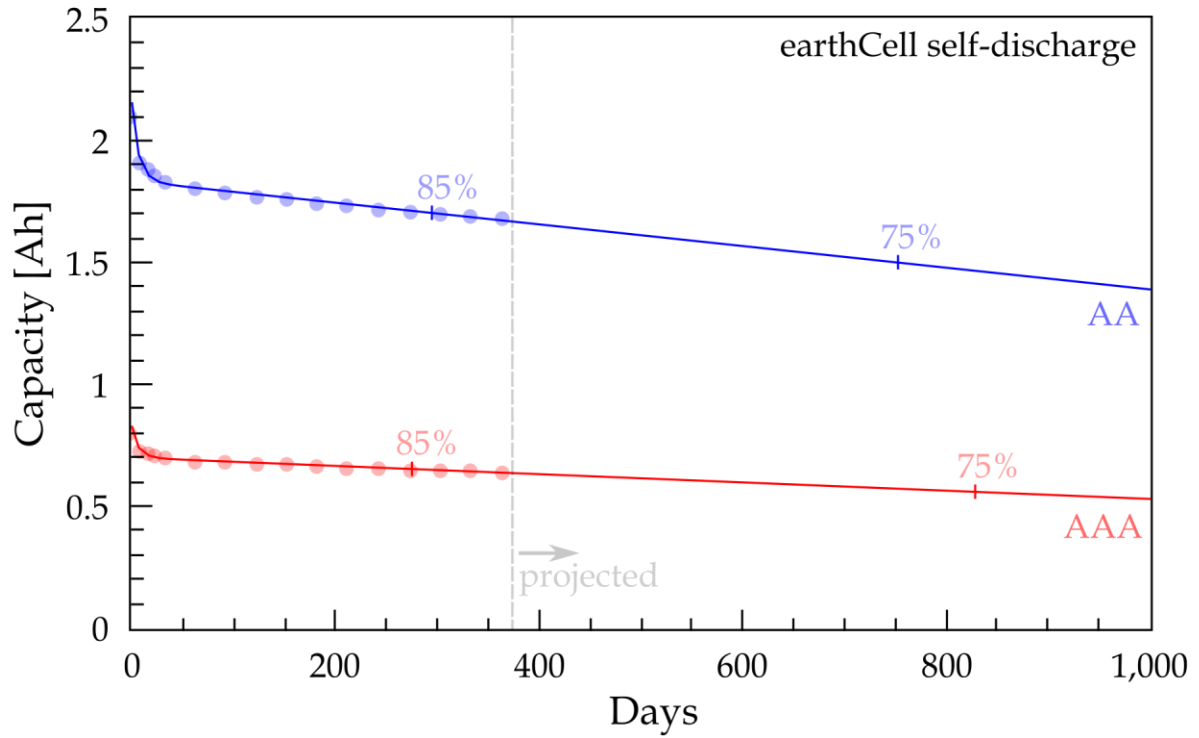

\*All discharge capacity tests are at constant current and discharge down to a 0.9V cutoff.

\* These are the detailed competitor data summarized on the previous capacity comparison plot.

\*earthCell batteries exhibit a very low self-discharge rate. The projected capacity at 5 years remains around 50%.
